## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: in the apparatus, method, and computer program as claimed, the claims address computed tomography where the reconstructed data is partitioned into a plurality of regions based on either image quality (independent claims 1, 22, 26, 37, and 39), or generation from intersecting radiation paths from diametrically opposed source positions (independent claims 13, 31, 36, and 38). This feature is neither shown nor fairly suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Suarez *et al.* US 2004/0062447 A1 shows images divided by quality for data transmission, and Turpin US 5,3894,573 A, US 5,736,958 A, and US 5,751,243 A show diametrically opposed source positions used for holography.
